Lubricating Oil For Diesel & Heavy Duty Machinery

Turbine Oils

Eni OTE is a lubricant specifically designed for use in steam and gas turbine applications. It's based on high quality base-stocks with specially chosen additives to provide excellent thermal-oxidative, rapid air release and excellent demulsibility that permits water to separate readily from the oil. Eni OTE provides outstanding performance in turbo-blowers, hydraulic machinery and air compressors with medium/high temperature of the compressed air and in all other applications requiring a high quality and good stability lubricant.

Heavy Duty Oils

We have long-term relationships with many of the country's largest and most productive mining and construction companies. Decades of experience have resulted in the formulation of lubricants, fluids and coolants that maximise operations and minimise downtime in some of Australia's harshest operating conditions.

Eni-Chematek in collaboration with a joint international technical team provide ongoing R&D and technical support helping you to reduce your costs by providing high performance products which deliver:

- enhanced component protection
- extended equipment and oil life
- improved operating efficiencies

Team Work

Sebagai Distributor Oli Agip/Eni, baik untuk Jenis Oli & Gas, Marine dan Industrial kami dapat mensupport kebutuhan Oli sebagai berikut :

Produk Diesel Engine Oil, Transmission Oil, Gear Oil, Compressor Oil, Hydraulic Oil, Circulating & Bearing, Heat Transfer Oil, Slideway Oil, Turbine Oil, Trafo Oil, Metal Working Fluid, Synthetic Oil, Corrosion Preventive, Wire Rope & Specialities Oil (Food Grade Product).
